

**Imperial Irrigation District**  
**(El Centro, CA)**

**Power Resource Manager**

The Imperial Irrigation District (IID), Energy Department has become the sixth largest consumer-owned utility in the state and is widely regarded as an economic catalyst in the Imperial and Coachella Valleys where it serves more than 140,000 residential, commercial and industrial customers. Under general direction of the Assistant General Manager, Energy, the Power Resource Manager manages the activities and personnel engaged in, day ahead and real time trading and scheduling for energy and natural gas, generation system planning; energy management and strategic marketing; geothermal and renewable energy development; resource planning, business analysis and development. Requires a bachelor's degree (a master's degree and registration as an Electrical Engineer with the State of California are desired); *and* ten years of increasingly responsible supervisory experience in resource planning, natural gas and electricity trading and hedging for a utility. Salary DOQ. Please apply online by **February 18, 2011** at [www.allianceresourceconsulting.com](http://www.allianceresourceconsulting.com).
